

Dali Maleyile

Application for the Conference in Bloemfontein in September 2014

As I already have an experience in developing the deep rural areas, I'm really interested in helping those who are struggling and who need help with choosing their way to live.

Although I'm a professional I'm really happy when someone comes to ask for help and then I feel really sad when I have no solution.

My dream is to help the poor communities and the people as much as possible.

On the other side I want to see that these communities are rising up instead of becoming like cities.

Just to have basic needs like water, electricity and every boy must have something to do - not just waiting for someone to come and do things for them.

Everyone just needs an idea and then you can do what you want, when you have an idea and the goal/dream of what you want.

As Dave came to develop our community, so I want to take it from there in my future to the other villages around Nqileni.

Thank you
